Ankara, Türkiye

EDUCATION

Nallıhan Vocational School, Ankara University **2025 – Present**
Associate Degree, Computer Programming | GPA: 3.34

Şevket Raşit Hatipoğlu Anatolian High School **2019 – 2023**
Science Track | High School Diploma

PROJECTS

C++ Practice & Coursework Projects

Developed console-based software solutions focusing on core C++ syntax, memory management, and data validation.

- Built a Student Grading System that validates input scores, calculates averages, identifies min/max grades, and formats letter grades.
- Utilized STL <algorithm>, loops, arrays, and conditional logic.

Technologies: C++, STL, Git

Web Development Projects

Created responsive and interactive web interfaces to practice modern front-end technologies.

- Designed structure and styles using HTML5, CSS3 (Flexbox & Grid), and JavaScript for user interactions.

Technologies: HTML5, CSS3, JavaScript

2D/3D Game & Asset Development (Unity & Blender)

Engineered gameplay mechanics, environment interactions, and 3D assets.

- Programmed player movements, physics systems, and UI logic in C# using Unity.
- Created custom 3D low-poly models, mesh assets, and props using Blender for game environment integration.

Technologies: Unity, C#, Blender

TECHNICAL SKILLS

Programming Languages:	C++, JavaScript, C# (Unity)
Web Technologies:	HTML5, CSS3, Flexbox & Grid
Databases & Tools:	MySQL, SQL Queries, XAMPP
3D Design & Modeling:	Blender (Mesh Editing, Asset Integration)
Tools & Systems:	Git, GitHub, Command Line Interface (CLI)
Core Concepts:	Data Structures, Algorithms, Object-Oriented Programming (OOP)

LANGUAGES & INTERESTS

Languages:	English (Intermediate / Technical Documentation), Turkish (Native)
Interests:	System Architecture, Cloud Technologies, Combat Sports (Boxing / Kickboxing)
